MECHANISMS OF AGEING AND DEVELOPMENT

SUBJECT INDEX
Volume 51 (1990)

accessory cells, ageing, T cell activation, 265
acetylcholinesterase, aging, Fischer 344 rats, chronotropic effects, muscarinic agonists, 81
adrenaline, ageing, rat, blood vessels, 277
adrenal cortex, aging, neural regulation, hormones, thyroid, testicles, 89
age, glucose absorption, ileum, rat, 243
age, monocyte, phagocytosis, sex, 55
age, neurohypophysis, morphology, osmotic load, antidiuretic hormone, neuroplasticity, 157
ageing, adrenaline, rat, blood vessels, 277
ageing, CD4 + T cells, interleukin 2 interleukin 2 receptor, alloreactivity, 179
ageing, osteogenesis, rat osteoblasts, alkaline phosphatase, 121
ageing, smooth and ciliary muscle, collagen, basal lamina, prostaglandin $F_{2\alpha}$, *Macaca fascicularis, Macaca mulatta,* 101
ageing, T cell activation, accessory cells, 265
age pigment, sympathetic ganglion, vagal ganglion, spinal ganglion, rat, vitamin E, selenium, 63
aging, B lymphocytes, inbred strains of mice, lymphocyte surface molecules, lymphocyte activation, immune function, 223
aging, cell cycle, vaginal epithelium, 73
aging, Fischer 344 rats, chronotropic effects, muscarinic agonists, acetylcholinesterase, 81
aging, hippocampus, cellular metabolism, 33
aging, neural regulation, hormones, thyroid, adrenal cortex, testicles, 89
aging, rat liver, microsomal drug metabolism, ethanol inhibition, kinetics, microsomal ethanol oxidation, 139
aging, senescence-accelerated mouse, erythrocyte membrane, 215
alkaline phosphatase, osteogenesis, ageing, rat osteoblasts, 121
alloreactivity, ageing, CD4 + T cells, interleukin 2, interleukin 2 receptor, 179
antidiuretic hormone, age, neurohypophysis, morphology, osmotic load, neuroplasticity, 157
antioxidant enzymes, oxygen derived free radicals, peroxides, inactivation, critical threshold, 283

basal lamina, ageing, smooth and ciliary muscle, collagen, prostaglandin $F_{2\alpha}$, *Macaca fascicularis, Macaca mulatta,* 101
blood-brain barrier, Evans-blue, electroconvulsive shock, 149
blood vessels, ageing, adrenaline, rat, 277
B lymphocytes, inbred strains of mice, lymphocyte surface molecules, lymphocyte activation, aging, immune function, 223

catalase, human fibroblasts, dividing potential, free radicals, superoxide dismutase, glutathione peroxidase, 41
CD4 + T cells, ageing, interleukin 2, interleukin 2 receptor, alloreactivity, 179
cellular metabolism, aging, hippocampus, 33
cellular senescence, RNA content, flow cytometry, human fibroblasts, 195
cell cycle, vaginal epithelium, aging, 73
chromosomal breakage syndromes, reverse transcriptase, genetic flux, human fibroblasts, 133
chronotropic effects, aging, Fischer 344 rats, muscarinic agonists, acetylcholinesterase, 81
collagen, ageing, smooth and ciliary muscle, basal lamina, prostaglandin $F_{2\alpha}$, *Macaca fascicularis, Macaca mulatta,* 101
critical threshold, antioxidant enzymes, oxygen derived free radicals, peroxides, inactivation, 283

dividing potential, human fibroblasts, free radicals, superoxide dismutase, catalase, glutathione peroxidase, 41

electroconvulsive shock, Evans-blue, blood-brain barrier, 149
erythrocyte membrane, senescence-accelerated mouse, aging, 215

ethanol inhibition, aging, rat liver, microsomal drug metabolism, kinetics, microsomal ethanol oxidation, 139
Evans-blue, blood-brain barrier, electroconvulsive shock, 149

Fischer 344 rats, aging, chronotropic effects, muscarinic agonists, acetylcholinesterase, 81
flow cytometry, RNA content, cellular senescence, human fibroblasts, 195
food restriction, longevity hormesis, toxicity, Gompertz function, mortality kinetics, prolonged life span, 1
free radicals, human fibroblasts, dividing potential, superoxide dismutase, catalase, glutathione peroxidase, 41

genetic flux, reverse transcriptase, human fibroblasts, chromosomal breakage syndromes, 133
glucose absorption, ileum, age, rat, 243
glutathione peroxidase, human fibroblasts, dividing potential, free radicals, superoxide dismutase, catalase, 41
Gompertz function, longevity hormesis, toxicity, food restriction, mortality kinetics, prolonged life span, 1

hippocampus, aging, cellular metabolism, 33
hormones, aging, neural regulation, thyroid, adrenal cortex, testicles, 89
human fibroblasts, dividing potential, free radicals, superoxide dismutase, catalase, glutathione peroxidase, 41
human fibroblasts, reverse transcriptase, genetic flux, chromosomal breakage syndromes, 133
human fibroblasts, RNA content, flow cytometry, cellular senescence, 195

ileum, glucose absorption, age, rat, 243
immune function, B lymphocytes, inbred strains of mice, lymphocyte surface molecules, lymphocyte activation, aging, 223
inactivation, antioxidant enzymes, oxygen derived free radicals, peroxides, critical threshold, 283
inbred strains of mice, B lymphocytes, lymphocyte surface molecules, lymphocyte activation, aging, immune function, 223
interleukin 2, ageing, CD4 + T cells, interleukin 2 receptor, alloreactivity, 179
interleukin 2 receptor, ageing, CD4 + T cells, interleukin 2, alloreactivity, 179

kinetics, aging, rat liver, microsomal drug metabolism, ethanol inhibition, microsomal ethanol oxidation, 139

longevity hormesis, toxicity, food restriction, Gompertz function, mortality kinetics, prolonged life span, 1
lymphocyte activation, B lymphocytes, inbred strains of mice, lymphocyte surface molecules, aging, immune function, 223
lymphocyte surface molecules, B lymphocytes, inbred strains of mice, lymphocyte activation, aging, immune function, 223

Macaca fascicularis, ageing, smooth and ciliary muscle, collagen, basal lamina, prostaglandin $F_{2\alpha}$, *Macaca mulatta,* 101
Macaca mulatta, ageing, smooth and ciliary muscle, collagen, basal lamina, prostaglandin $F_{2\alpha}$, *Macaca fascicularis,* 101
microsomal drug metabolism, aging, rat liver, ethanol inhibition, kinetics, microsomal ethanol oxidation, 139
microsomal ethanol oxidation, aging, rat liver, microsomal drug metabolism, ethanol inhibition, kinetics, 139
mitochondrial damage, oxygen radicals, threshold, 249
monocyte, phagocytosis, sex, age, 55
morphology, age, neurohypophysis, osmotic load, antidiuretic hormone, neuroplasticity, 157
mortality kinetics, longevity hormesis, toxicity, food restriction, Gompertz function, prolonged life span, 1
muscarinic agonists, aging, Fischer 344 rats, chronotropic effects, acetylcholinesterase, 81

neural regulation, aging, hormones, thyroid, adrenal cortex, testicles, 89
neurohypophysis, age, morphology, osmotic load, antidiuretic hormone, neuroplasticity, 157
neuroplasticity, age, neurohypophysis, morphology, osmotic load, antidiuretic hormone, 157

osmotic load, age, neurohypophysis, morphology, antidiuretic hormone, neuroplasticity, 157
osteogenesis, ageing, rat osteoblasts, alkaline phosphatase, 121

oxygen derived free radicals, antioxidant enzymes, peroxides, inactivation, critical threshold, 283
oxygen radicals, mitochondrial damage, threshold, 249

peroxides, antioxidant enzymes, oxygen derived free radicals, inactivation, critical threshold, 283
phagocytosis, monocyte, sex, age, 55
prolonged life span, longevity hormesis, toxicity, food restriction, Gompertz function, mortality kinetics, 1
prostaglandin $F_{2\alpha}$, ageing, smooth and ciliary muscle, collagen, basal lamina, *Macaca fascicularis, Macaca mulatta,* 101

rat, ageing, adrenaline, blood vessels, 277
rat, age pigment, sympathetic ganglion, vagal ganglion, spinal ganglion, vitamin E, selenium, 63
rat, glucose absorption, ileum, age, 243
rat liver, aging, microsomal drug metabolism, ethanol inhibition, kinetics, microsomal ethanol oxidation, 139
rat osteoblasts, osteogenesis, ageing, alkaline phosphatase, 121
reverse transcriptase, genetic flux, human fibroblasts, chromosomal breakage syndromes, 133
RNA content, flow cytometry, cellular senescence, human fibroblasts, 195

selenium, age pigment, sympathetic ganglion, vagal ganglion, spinal ganglion, rat, vitamin E, 63
senescence-accelerated mouse, aging, erythrocyte membrane, 215
sex, monocyte, phagocytosis, age, 55
smooth and ciliary muscle, ageing, collagen, basal lamina, prostaglandin $F_{2\alpha}$, *Macaca fascicularis, Macaca mulatta,* 101
spinal ganglion, age pigment, sympathetic ganglion, vagal ganglion, rat, vitamin E, selenium, 63
superoxide dismutase, human fibroblasts, dividing potential, free radicals, catalase, glutathione peroxidase, 41
sympathetic ganglion, age pigment, vagal ganglion, spinal ganglion, rat, vitamin E, selenium, 63

testicles, aging, neural regulation, hormones, thyroid, adrenal cortex, 89
threshold, mitochondrial damage, oxygen radicals, 249
thyroid, aging, neural regulation, hormones, adrenal cortex, testicles, 89
toxicity, longevity hormesis, food restriction, Gompertz function, mortality kinetics, prolonged life span, 1
T cell activation, ageing, accessory cells, 265

vagal ganglion, age pigment, sympathetic ganglion, spinal ganglion, rat, vitamin E, selenium, 63
vaginal epithelium, cell cycle, aging, 73
vitamin E, age pigment, sympathetic ganglion, vagal ganglion, spinal ganglion, rat, selenium, 63
